

Setting up external e-mail clients

Basic steps to setup external email clients (Thunderbird, Outlook etc.) to work with Horde.

WARNING! IT cannot help with problems caused by external clients. **The official** e-mail client is **Horde**.

Server settings for incoming messages:

```
type - imap
address - imap.opf.slu.cz
port - 993
security - SSL
```

Server settings for outgoing messages:

```
address - smtp.opf.slu.cz
port - 465
security - SSL
```

CRO username and password is required for sending and receiving e-mails.
