

# Setting up the Eduroam

## Connection to the Eduroam

To connect to the Eduroam network, you need to complete the following two steps.

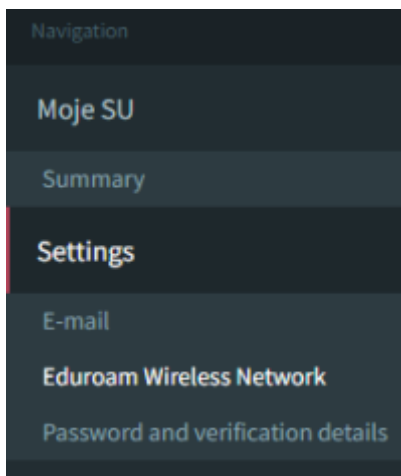

### Step 1: Setting-up the identity

To connect to the Eduroam network, you will need a Eduroam Identity (username and password). This is set-up through the CRO portal [moje.slu.cz](https://moje.slu.cz):

- Login onto the website [moje.slu.cz](https://moje.slu.cz) with your CRO credentials.

- In the left menu click in the **Settings** on **Eduroam Wireless Network**.

- Follow the simple instructions on the opened page.

Settings

My SU

Eduroam Wireless Network

Information

Access to Wi-Fi network Eduroam is active.

User name

@slu.cz

Change Eduroam password

Fill the CRO password

The password must contain at least six characters, lower and upper case and number. Password must be different from the CRO password.

Fill the new Eduroam password

Repeat the new Eduroam password

Change Eduroam password

Your username will always be in the form of „**your\_CRO\_username@slu.cz**“ (for example **xyz9876@slu.cz**). The form of the Eduroam username is the same for all members of the SU (every faculty or institute will use **@slu.cz**).

## Step 2: Setting-up the wifi on your device

After setting up your Eduroam identity, you will need to complete the setup of the Eduroam on your device. Depending on the operating system this can usually be finished simply by filling up the Eduroam username and password. Although more secure way is to use app to set you device. **Our department strongly advises to use one of the automatic utilities!**

**geteduroam - utility for automatic setting of Eduroam for Windows, Mac and Android**
